DETAILED ACTION

Allowable Subject Matter

1. Claims 1-10 are allowed. The following is an examiner's statement of reasons for allowance: the prior art fails to teach or make obvious detecting bemf of a motor; outputting a current value of a current fed to the motor based on the bemf; an offset calculation section that: determines when the motor cant be driven by the motor coil and thus no bemf appears, reads as a first output the output of the bemf detection as obtained when the drive current is equal to zero, reads as a second output the output of the bemf detection as obtained when the current fed to the motor is equal to a predetermined value, then calculates based on the difference between the first and second outputs an offset that appears in the output of the bemf detection section as a result of a change in internal resistance of the motor coil; and eliminates the offset by changing an amplification factor of the bemf detection section.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
